Mumbai, Maharashtra - 400024, India

EDUCATION

- **Anjuman-I-Islam Kalsekar Technical Campus - Mumbai University** Aug 2018 - May 2022
Bachelor of Engineering - Computer Engineer Navi Mumbai, India
- CGPA: 7.53/10

EXPERIENCE

- **Tsim Communications Pvt Ltd** Nov 2022 - Present
Software Developer - Full Stack Developer Dadar-Mumbai, India
 - Developed and maintained the Simmis system to manage SIM card activations, deliveries, document verification, and stock management for multiple marketplaces, supporting internal teams with booking, payment, and reconciliation tasks.
 - Built new features and resolved system bugs based on user team requirements, while updating legacy code to enhance performance and maintainability.
 - Integrated Amazon SP-API for 19 marketplaces, automating order downloads, inventory updates, and feedback requests, and migrated from MWS to SP-API for improved efficiency.
 - Automated settlement report downloads using AWS SQS and other AWS services, streamlining financial processes and reducing manual tasks.
 - Developed custom scripts for automated email notifications, SIM card activations, and top-up recharges using the EliteMobile API, boosting operational efficiency.
 - Implemented Shiprocket and Bluedart APIs to automate logistics processes.
 - Managed data using PostgreSQL, optimizing system performance and ensuring accuracy in operations.
- **Apexon-Adapty Solutions Pvt Ltd** June 2022 - Oct 2022
Software Engineer - Backend Developer Thane-Mumbai, India
 - Developed and maintained backend systems, including creating and debugging APIs.
 - Implemented an API to delete selected items from the cart, enhancing user experience.
 - Analyzed and understood existing code architecture for better integration.
 - Collaborated with development and testing teams to create solutions meeting client needs.

PROJECTS

- **Personal Portfolio** [🔗]
Tech: [React 18, Tailwind CSS, Framer Motion, Lucide React, Intersection Observer, TypeAnimation]
 - Designed and developed a modern, responsive portfolio website to showcase my full-stack development skills and professional journey. Key features include:
 - Immersive UI and Animations: Dark theme with glass morphism, Framer Motion transitions, cursor particle trails, and animated text effects
 - Interactive Elements: Testimonials carousel, downloadable resume button, Buy Me a Coffee integration, and artistic profile photo styling
 - Project Navigation: Seamless links to my blog and eCommerce store—two additional live projects demonstrating content management and transactional workflows
- **Personal Digital Library Platform** [🔗]
Tech: PERN stack (PostgreSQL, Express, React, Node.js)
 - Developed a secure, responsive platform where users can upload and organize books and PDFs into a personalized library, featuring elegant UI/UX, reading progress tracking, and dashboard analytics.
 - Built secure authentication with JWT-style session management and client-side persistence
 - Designed drag-and-drop file uploads, smart search/filtering, and visual reading progress tracking

• Full-Featured eCommerce Web App — Built with complete user and admin functionality.-1

Tech: [PERN stack (PostgreSQL, Express.js, React, Node.js)]

- Developed secure user authentication, profile management, and role-based access control for streamlined user experience.
- Engineered dynamic product catalog with category filtering, search, and detailed product views including images and descriptions.
- Implemented shopping cart and checkout flow with real-time updates, integrated order tracking, and backend validation.
- Designed admin dashboard for product CRUD operations and order management, ensuring scalable backend performance.

• Job Application Management System

Tech: [React 18, TypeScript, Tailwind CSS, Node.js/Express, MongoDB, AWS, GraphQL, Recharts, jsPDF, xlsx, file-saver]

- Built a dashboard with analytics including visual statistics, interactive charts, and success rate indicators.
- Developed full CRUD operations with form validation, error handling, and job status tracking (Applied, Interview, Offer, Rejected).
- Implemented advanced filtering, search, and sorting for efficient job application management.
- Added data export capabilities with PDF and Excel reports for professional reporting.

• Personal Finance Dashboard

Tech: [React 18, Tailwind CSS, Vite, Recharts, Lucide React,]

- Built a responsive financial dashboard with real-time income, expense, and budget tracking using React and Recharts.
- Implemented transaction management with category tagging, date selection, and form validation for accurate data entry
- Developed budget tracking features with progress indicators, overspending alerts, and monthly comparisons
- Added advanced reporting tools including 12-month trend analysis, category breakdowns, and CSV export functionality
